

NEW PATIENTS

Please call our office if you would like more information about our practice or if you or a loved one would like to become a patient and request a New Patient Packet.

(817)-522-1530

We will send you our New Patient Packet by e-mail, fax, or postal mail as you desire. Once we receive your completed documents and verify insurance we will call you to schedule your first appointment.

ROUTINE APPOINTMENTS

Appointments are usually scheduled every four weeks with one of our providers (physician or nurse practitioner). We work closely with home health and hospice agencies to arrange for weekly skilled nursing visits and aides as necessary.

Additionally, we recommend physical and occupational therapy for patients with gait instability or weakness after an illness or extended bed rest. Our team works to help our patients function at their highest possible level of health.

In the event of an urgent need, we schedule acute appointments as soon as possible. We work with hospitalists for any inpatient hospital stay of our patients - Texas Health Resources, Plaza Medical Center, Baylor Scott & White, and Medical City name a few.

BILLING

We bill Medicare, Medicare replacement plans, or your Commercial Insurance plan for our medical services and accept many secondary insurances policies.

Your Mobile Geriatric Clinic

Physician Senior Services partners with families, residences, home health and hospice agencies, lab and imaging services, and medical equipment companies to provide the best possible care for our patients.

ABOUT US

Physician Senior Services is a team of qualified medical professionals providing continuity of medical care to limited mobility and home-bound residents of independent and assisted living residences throughout the Dallas/Fort Worth Metroplex. Our goal is to provide a continuation of the patient-physician relationship often lost when a patient becomes homebound.

We provide the full scope of services offered in a physician's office in the comfort of the patient's home. Our dedicated team of physicians, nurse practitioners, physician assistants, nurses, and medical assistants coordinate patient care by arranging home health nursing and physical, occupational, and speech therapy, as well as hospice services. Lab work, EKGs, echocardiograms, x-rays, and Doppler ultrasounds are available often on the same day.

Physician Senior Services improves both access and quality of care for people who have difficulty reaching a medical facility. Our team prevents hospitalizations by making routine house calls. Our patients enjoy first-class health care in the comfort of their own home. Using mobile medical assessment tools and services allows us to provide complete continuity of care.

OUR MISSION

Physician Senior Services' mission is to provide exceptional, compassionate, and convenient medical care to patients in the Dallas/Fort Worth area.

ABOUT OUR COMPANY

Physician Senior Services was founded in March 2010 under the premise of improving access to medical care for elderly and disabled patients in the Dallas/Fort Worth Metroplex.
